Hi Shyam,

Please share the ballpark estimate for this scope of work.

Thanks
Manabendra Sarkar

Hello Manabendra,
Please see the user-stories attached with this email.
The client's website can be seen here : <http://nextgendrainage.com>
Essentially the client has heavy farm equipments and his company provides drainage installation services to farm owners.

He needs a customer facing app to do the following -

- 1) Access the google earth image of their farms and mark the border, underground pipes, trees etc. (line drawings, pin plotting etc. - this is where we will need SVG editor resource)
- 2) Access educational resources (blogs, videos and case studies).
- 3) Check the schedules of his field staff and request site visits (the scheduling information comes from SmartSheets via REST APIs)

The customer is trying to raise money and he needs an MVP app to help with funding process. He comes from a personal reference, so there is a good chance that we might win this one. (depends on costing though)
The work might start asap as he plans to release app before summers (growing season)

I understand that the requirements are bit vague at the moment, but we have to give him a ballpark number by Friday.
Let me know your estimates asap.
